Correction to “Involving Knowledge Users in Health Services Research: Collective Reflections and Learning From a National Evaluation of Recurrent Miscarriage Services”

Hennessy, M., Dennehy, R., O’Leary, H., O’Donoghue, K., and RE:CURRENT Research Advisory Group (2024), “Involving Knowledge Users in Health Services Research: Collective Reflections and Learning From a National Evaluation of Recurrent Miscarriage Services,” *Health Expectations*, 27: e70125. <https://doi.org/10.1111/hex.70125>.

Some errors were identified in Table 1 following publication of the article. The text regarding knowledge user involvement in work packages 3, 4 and 5 is incorrect, reading as follows for each in the original published article:

- Nine meetings of the Advisory Group; involvement in other work packages highlighted above.
- Participated in evaluation of quality of involvement (two surveys, World Café).
- Participated in the development of national clinical guidelines for recurrent miscarriage.
- Contributed to research papers, videos, infographics, media articles, blogs and project updates.

Please refer to the corrected text in the revised Table 1 below.

This is an open access article under the terms of the [Creative Commons Attribution](#) License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited.

TABLE 1 | Project activities and knowledge user involvement.

WP	Project activities	Knowledge user involvement
1	Identification, synthesis and appraisal of clinical practice guidelines for recurrent miscarriage care	- Involved in development of protocol for the systematic review and the interpretation of findings. - Authorship on both published papers—protocol and review (R.R.).
2	Evaluation of service provision in the Republic of Ireland against guideline-based key performance indicators (KPIs) for recurrent miscarriage care	- Agreed and participated in six-stage process to develop guideline-based KPIs, including two-round modified e-Delphi survey, four virtual consensus meetings, a final survey and virtual meeting. - Authorship on published papers—development of KPIs (R.R.); service evaluation (R.C., and O.O.C.).
3	National care experience survey	- Involved in devising/selecting survey questions, piloting the survey; assisted with participant recruitment (including photographs and quotes on survey flyers). - Authorship on published paper (C.L. and J.U.D.).
4	Qualitative interview study of knowledge user views and experiences of recurrent miscarriage services	- Informed the research questions, topic guide and study processes; assisted with participant recruitment; involved in the analysis and interpretation of findings. - Authorship on three papers (to date; two published)—definition of recurrent miscarriage (C.L. and J.U.D.); impact of the COVID-19 pandemic on care provision and experiences (C.L. and J.U.D.); service improvements (C.L. and J.U.D.).
5	Health economic analysis: (1) costs associated with the implementation of a best practice model of care; (2) impacts of receiving care	Part (2) involved analysis of survey data from work package 3. As such, Advisory Group members involved, informed the research question and study processes; assisted with participant recruitment; involved in the analysis and interpretation of findings.
6	Integrated knowledge translation	- Nine meetings of the Advisory Group; involvement in other work packages highlighted above. - Participated in evaluation of the quality of involvement (two surveys, World Café). - Participated in the development of national clinical guidelines for recurrent miscarriage. - Contributed to research papers, videos, infographics, media articles, blogs, project updates.

Note: R.R., J.U.D. and C.L.—parent advocates; R.C. and O.O.C.—health professionals.
Abbreviation: WP, work package.

We apologise for these errors.
