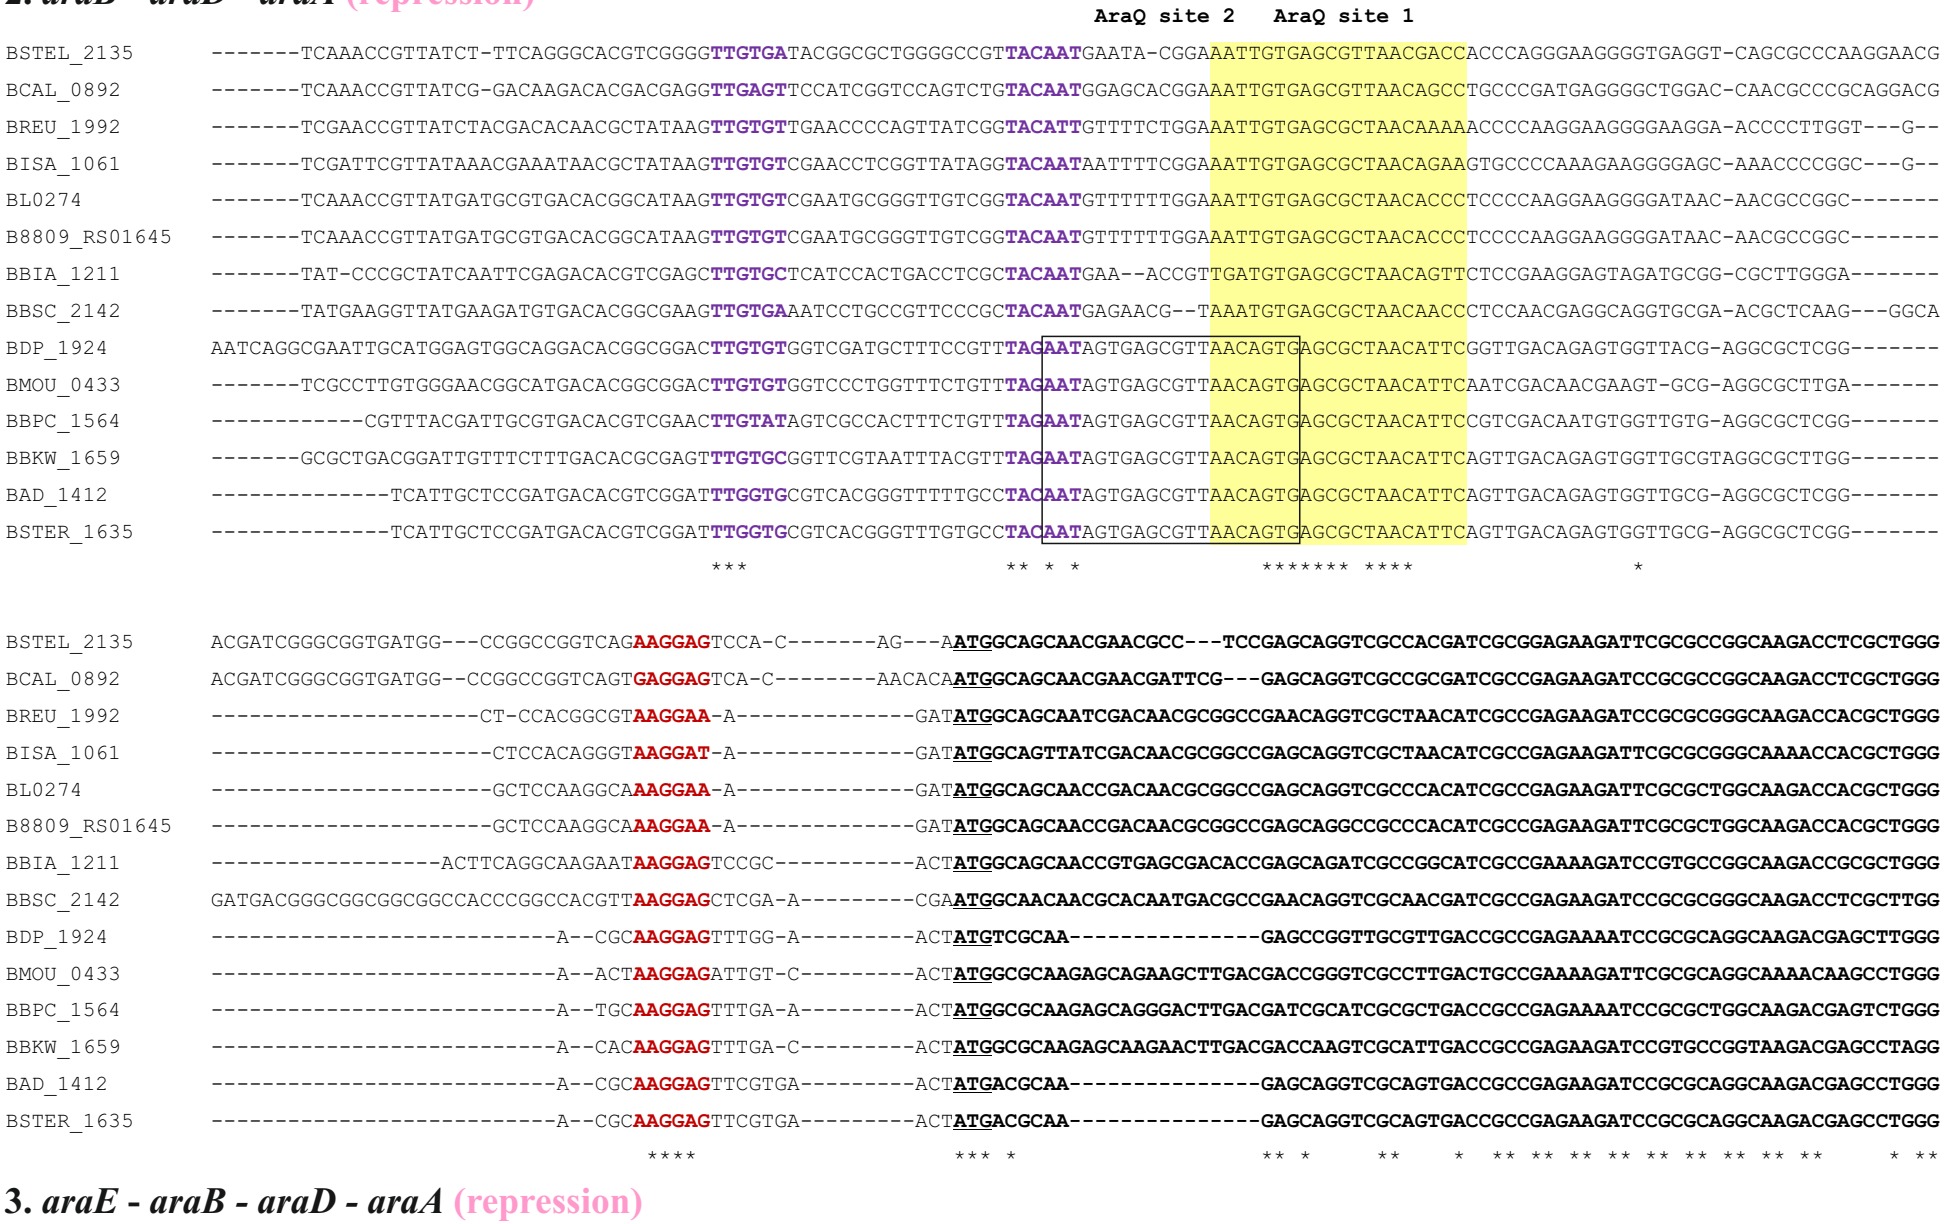

FIGURE S1. Multiple sequence alignments of gene upstream regions containing candidate AraQ-binding sites in *Bifidobacterium* spp. Predicted AraQ-binding sites are highlighted in mild yellow (when several overlapping sites are present the weaker one is marked with a rectangle box). Candidate binding sites for Crp, MalR and BfrR1 are in blue, green and orange, respectively. Predicted promoter elements (-35 and -10 boxes) and shown in bold purple. Known transcription start sites are marked in bold red. Putative ribosome binding sites are shown in bold dark red. Coding sequences are in bold, initiation codons are underlined. Conservative nucleotides are marked with asterisks.
