Table 1 | Areas under Investigation in the Irish Biosimilar Consultation Paper	
Prescribing and Interchangeability	**By focusing on the remit of biological medicine prescribing, it is hoped that the low uptake of biosimilars in Ireland can be increased**
International Biosimilar Medicines Policies	**International policies are being examined to decide which policy, if any, could be implemented in the Irish context**
Education and Supports	**Educational programs and supports are being researched from the perspectives of the patient, healthcare professionals and pharmaceutical suppliers**
Incentives and Disincentives	**Incentives such as gain-sharing agreements and disincentives like patient co-payment systems are being analysed**
Tendering and Pricing Policies	**Internal and/or external referencing pricing arrangements as well as the various types of tendering processes used in different countries are being probed for their suitability in the Irish setting**
Prevention of Inappropriate Business Practices	**In addition to inappropriate business practices previously highlighted, exploration of such professional misconduct is being carried out**
