Title	Ferroelectric behavior in exfoliated 2D Aurivillius oxide flakes of sub-unit cell thickness
Authors	Keeney, Lynette;Smith, Ronan J.;Palizdar, Meghdad;Schmidt, Michael;Bell, Andrew J.;Coleman, Jonathan N.;Whatmore, Roger W.
Publication date	2020-01-30
Original Citation	Keeney, L., Smith, R. J., Palizdar, M., Schmidt, M., Bell, A. J., Coleman, J. N. and Whatmore, R. W. (2020) 'Ferroelectric behavior in exfoliated 2D Aurivillius oxide flakes of sub-unit cell thickness', Advanced Electronic Materials, 6(3), 1901264 (12pp). https://doi.org/10.1002/aelm.201901264
Type of publication	Article (peer-reviewed)

Ferroelectric Behavior in Exfoliated 2D Aurivillius Oxide Flakes of Sub-Unit Cell Thickness

Lynette Keeney, Ronan J. Smith, Meghdad Palizdar, Michael Schmidt, Andrew J. Bell, Jonathan N. Coleman, and Roger W. Whatmore*

Ferroelectric Behavior in Exfoliated 2D Aurivillius Oxide Flakes of Sub-Unit Cell Thickness
Supporting Information

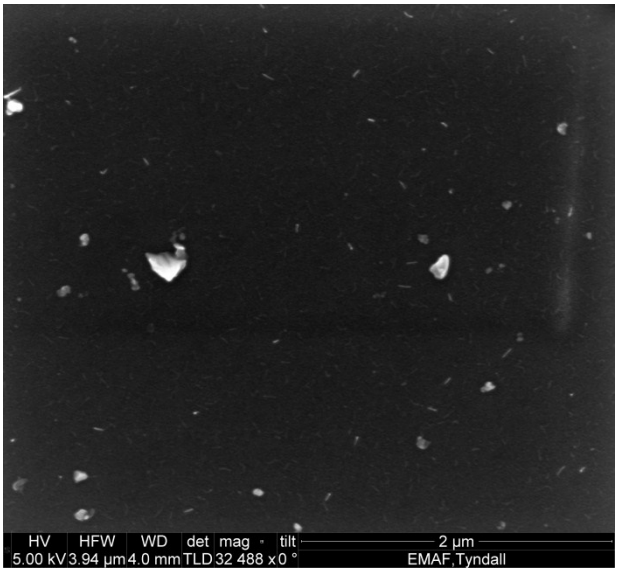

Figure S1. Supporting Information: Representative top-view HRSEM image of exfoliated B5TFCO flakes.

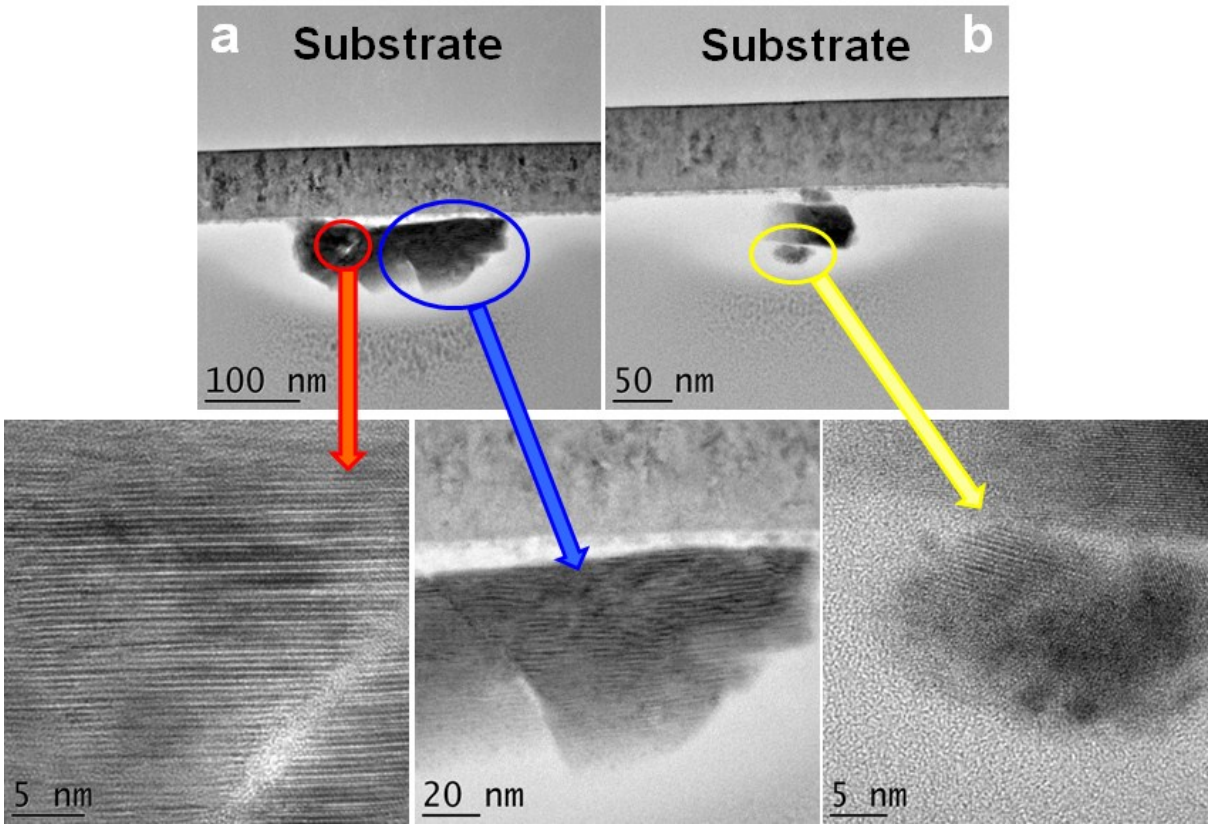

Figure S2. Cross-sectional TEM images of exfoliated B5TFCO flakes. HRTEM of a larger horizontal cluster of multi-flakes (maximum thickness of 80nm and diameter of 230nm) **a** and HRTEM of a smaller vertical multi-flake stack (maximum thickness of 65nm and diameter of 80nm) **b**.

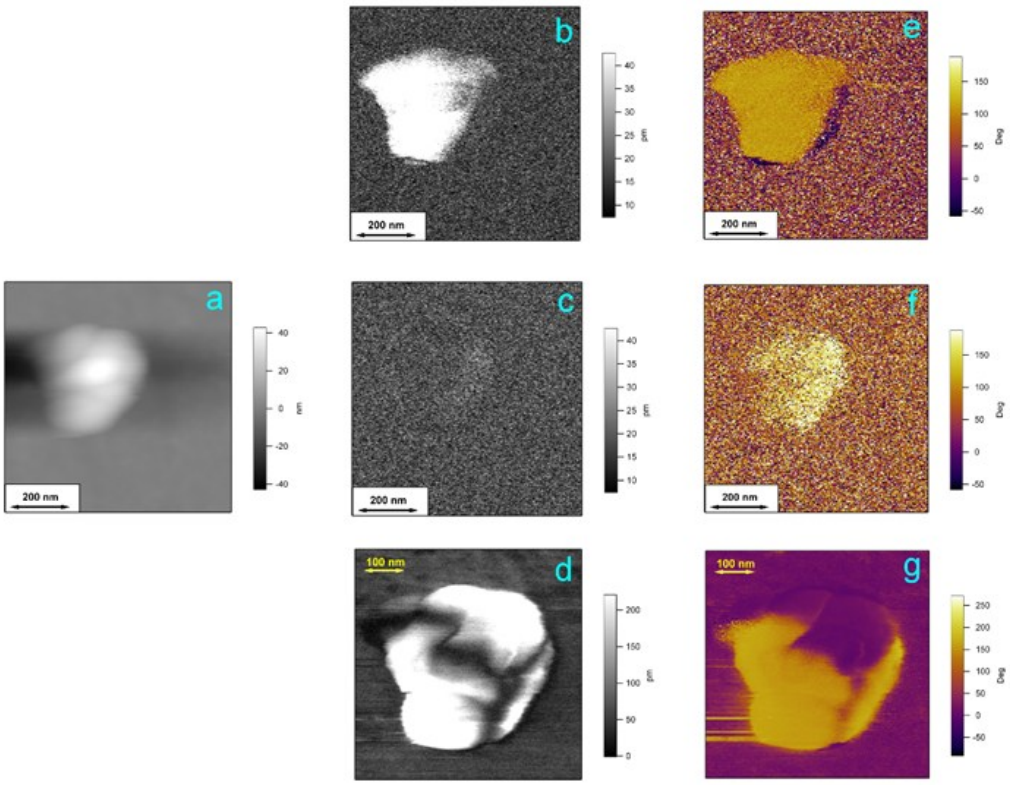

Figure S3. Representative **a.** topography, **b.** lateral single frequency PFM amplitude, **e.** lateral single frequency PFM phase, **c.** vertical single frequency PFM amplitude and **f.** vertical single frequency PFM phase **d.** vertical DART-PFM amplitude and **g.** vertical DART-PFM phase images of a multi-flake cluster of exfoliated B5TFCO.

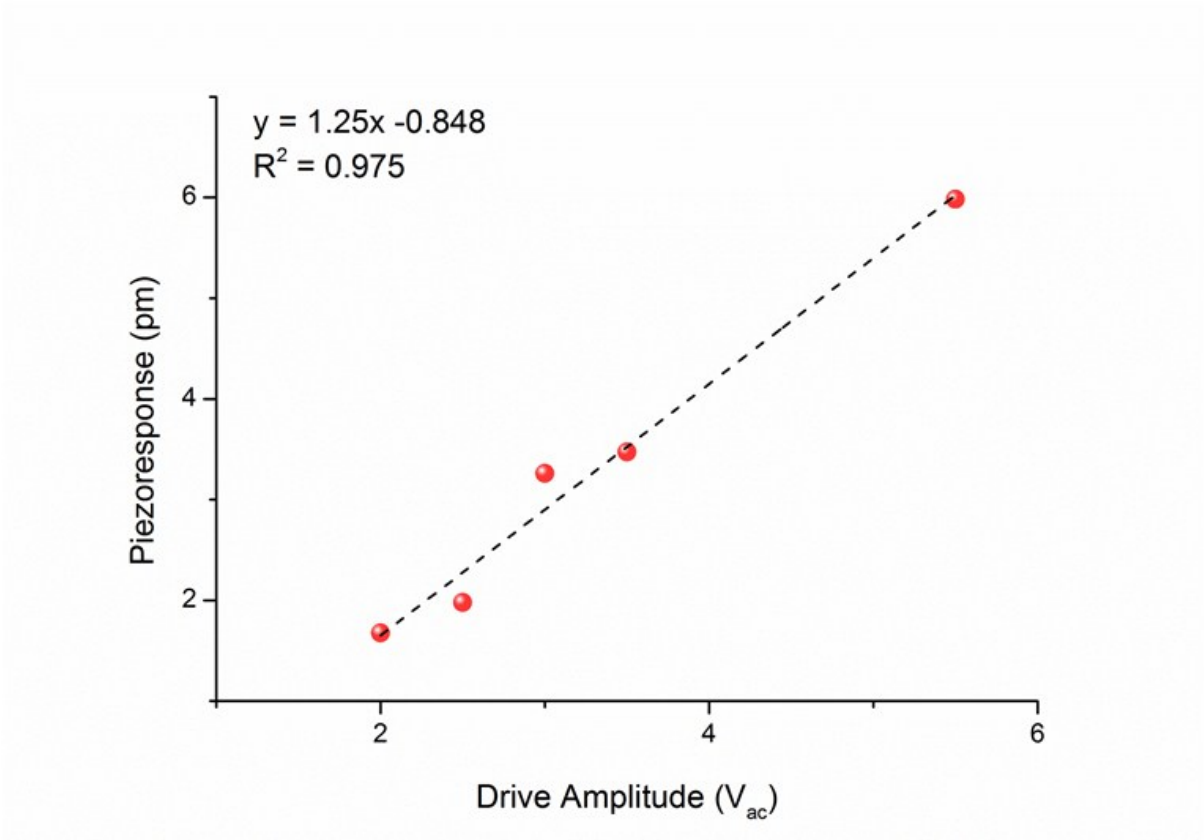

Figure S4. Piezoresponse as measured by vertical DART-PFM switching spectroscopy as a function of drive voltage (2.0 to 5.5V) at a constant DC bias of 15V. Note that the piezoresponse has not been normalized to pmV^{-1}, it has been displayed in picometers (pm) to allow for the change in piezoresponse as a function of voltage to be demonstrated.

PFM Response Modelling

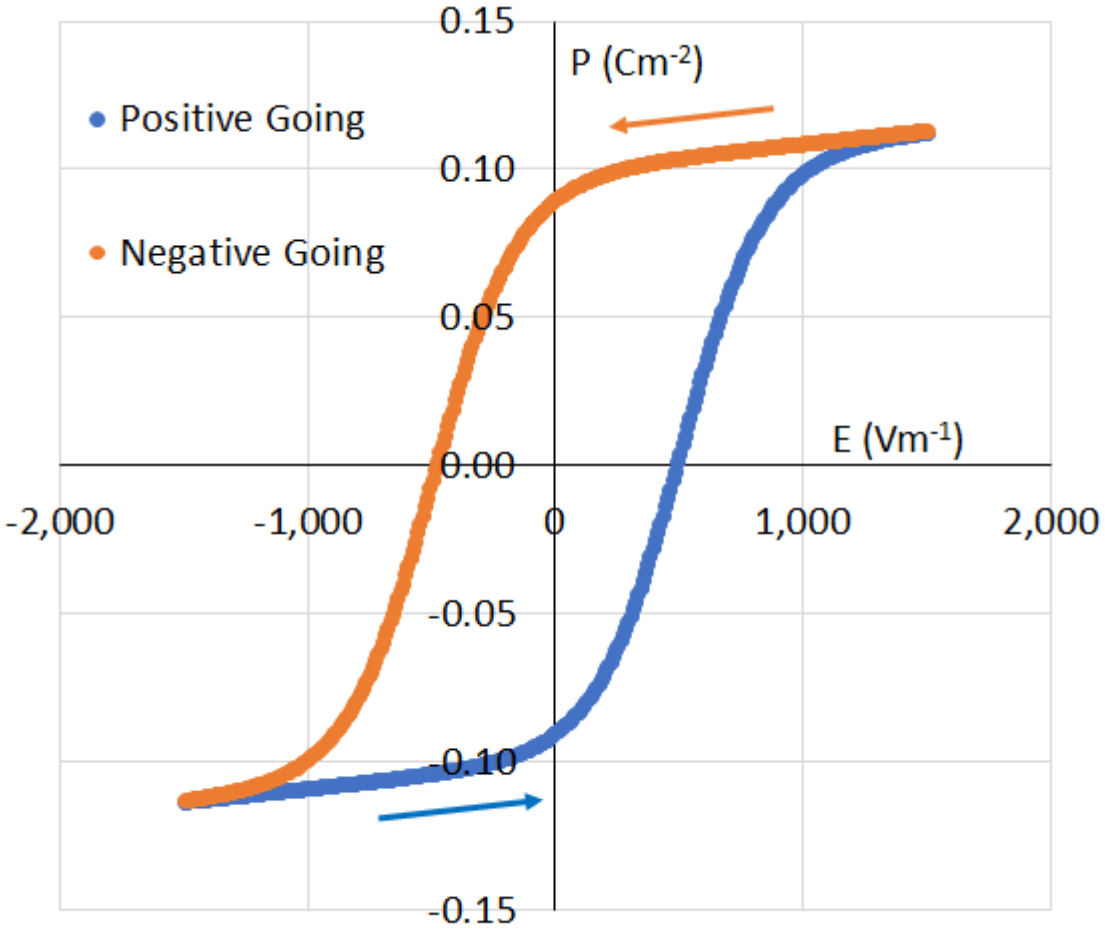

Figure S5. Model of ferroelectric hysteresis based on the function shown in Equation (S18) and (S19).

(P_S=0.1Cm^{-2}, P_R=0.09Cm^{-2}, E_c=500Vm^{-1}, ε_{opt} =2).
