Figure 7. See next page for caption.

Figure S1. Geodesic entropy before and after Ayahuasca intake for all 7 subjects. The first column depicts the curves to characteristic geodesic entropy for networks with the mean degree from $\langle k \rangle = 24$ to $\langle k \rangle = 39$ for before (blue) and after (brown) Ayahuasca intake. The second and third columns show the entropy-degree diagram for before and after respectively for networks with mean degree $\langle k \rangle = 32$. Note an increase of geodesic entropy for all subjects.
